FPS App-to-App / Web-to-App Payment Function

- Voice-over: Want to make payments faster and easier when shopping on mobile phone?
Use the FPS App-to-App and Web-to-App payment function then you don't need to save the QR code in advance or scan it with another mobile phone!
- Voice-over: Select FPS when you check out from the merchant app or its webpage the screen will automatically display the banking apps and e-wallets supporting this function in your mobile phone for you to choose
- Voice-over: The selected app will then open immediately
Check the payment details in display if correct, confirm the payment
The screen will then return to the merchant app automatically confirming the completion of the purchase
The payment is made so swiftly!
- Voice-over: This function is simple, fast, and secure
It does not require the input of credit card information
You can shop with your mobile phone anytime
- Voice-over: Apart from shopping, many fees in our daily lives can be settled by this function via FPS
- Voice-over: After adopting this function merchants can receive transaction records directly
Through automation there is no need to manually check the receipts one-by-one
More time can be saved to do more business

Voice-over: Merchants which have not yet adopted
the App-to-App or Web-to-App function
act quick and contact your bank
and e-wallet operator now!

Voice-over: FPS App-to-App
Payments made easy!
