of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an Al is required to deduct #10 all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities and other credit exposures to connected companies) under Basel III.

	Insignificant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)				
#18	Explanation For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the Monetary Authority that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business.				
	Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel II the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported ur adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Al's connected to deduction under the Hong Kong approach.	der the "Hong Ko	ong basis")		
	Significant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)		1		
#19	Explanation For the purpose of determining the total amount of significant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the Monetary Authority that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business.				
	Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel II the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported ur adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected to deduction under the Hong Kong approach.	der the "Hong Ko	ong basis")		
	Insignificant capital investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)				
	Explanation The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.				
	Insignificant capital investments in Tier 2 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation

Capital Disclosures Template – Explanatory Note

- 1. To facilitate international comparison, an authorized institution ("AI"), in making disclosures based on this template, must reproduce all rows (i.e. from number 1 to number 85) except for the subdivisions of rows under row numbers 26, 41 and 56 (e.g. 26a, 26b, 26c etc) where the AI may select or insert rows to include items that are applicable to it. Where the item described in any particular row is not applicable to an AI (e.g. because the AI does not have the item or the item is not applicable to Hong Kong), the AI must still retain the row and include an indication that the item is not applicable in its disclosures.
- 2. Certain emphases are incorporated in the presentation of the template to better explain its structure:
 - (i) Rows with item titles in italics are rows that will be deleted after all the ineligible capital instruments have been fully phased out (i.e. from 1 January 2022 onwards¹).
 - (ii) Shaded rows with borders indicate as follows:
 - A row shaded dark grey introduces a new section which provides details of a certain component of regulatory capital.
 - A row shaded light grey, with no thick border, represents the sum of cells in the relevant section above it.
 - A row shaded light grey, with a thick border, indicates a key component of regulatory capital and the regulatory capital ratios.
 - A row shaded yellow represents an item that is not applicable to Hong Kong.
- 3. The table below provides a detailed explanation of the item in each row of the template. Where appropriate, references to relevant sections of the Banking (Capital) Rules ("BCR") are also included for ease of reference.

-

According to paragraph 94(g) of the Basel III text, recognition of capital instruments that no longer qualify as non-common equity Tier 1 capital or Tier 2 capital will be capped at 90% of the notional amount of such instruments outstanding on 1 January 2013, with the cap reducing by 10% in each subsequent year (i.e. until 1 January 2022).

Row number	Explanatory note
1	Instruments issued by an AI that meet all the qualifying criteria for Common Equity Tier 1 ("CET1") capital as set out in Schedule 4A of the BCR.
