**Keep Your Personal Digital Keys Safe**

Colleague: My bank account was hacked!

Boss: Where are your home keys?  
You must look after your valuables with care!  
It's the same in the digital world  
Account login and personal information are just like the keys  
to your home

Super: Account login  
Personal information

Boss: and if stolen can be used to rob you  
Don't be surprised if your money is stolen  
after you use an unknown Wi-Fi  
or a public computer to access your bank account  
It is just like giving away your home keys  
Protect your digital keys  
at all times  
Do you change your password regularly?

Voice-over: Keep your personal digital keys safe!

Super: Keep your personal digital keys safe
