Guideline for Exemption of Custodian Fees for Retail Investors

Qualification of retail investors:

Only individuals are eligible for the exemption.

Procedure for exemption:

1. In order to obtain exemption, CMU Participants must declare that their holdings on behalf of their clients have fulfilled the above criterion.
2. The CMU Participants have to sign the **“Declaration for Exemption of CMU Custodian Fees – Retail Individual Investors”** (Appendix A.7) to claim exemption of custodian fees on debt securities held by retail investors.
3. Upon receipt of the form A.7 from the CMU Participants, the custodian fees of the designated CMU “specific custody accounts” will be waived.
4. Besides claiming exemption through “specific custody account”, participants can choose to safe-keep debt securities of all their eligible clients in the “general custody account” to claim exemption. The “General Custody Account – Retail Individual Investors” (XXXX801) is reserved for the purpose. Please return Appendix A.6 together with A.7 to the CMU should you wish to open such account.
5. Once the CMU Participants returned the completed declaration forms A.7 to the CMU for account XXXX801, the CMU Participants undertake that holdings in this account by their underlying clients are all individuals but not corporations.

Disclosure to retail investors:

CMU Participants have to disclose to their clients the exemption of custodian fees by the CMU, though CMU Participants retain their right to charge their client the custodian fees.

SECTION C: Profits Tax Concession under the Inland Revenue Ordinance

- We hope that this issue will be considered by the Inland Revenue Department (IRD) for eligibility for profits tax concession under sections 14A and 26A of the Inland Revenue Ordinance (IRO). We understand that any subsequent changes regarding this issue, such as credit rating, need to be reported to the MA and as the case may be, to the IRD, at the earliest time possible.

☐ Yes, I/we confirm that the instrument is, at issuance, issued in Hong Kong to:

☐ (i) 10 or more persons; or

☐ (ii) less than 10 persons, none of whom is an associate of the issuer of the instrument. (Please refer to section 14A(A) of the IRO for the definition of “associate”. For more information, you may also wish to visit http://www.ird.gov.hk/eng/tax/bus_pft.htm#08.)

(Please note that you may be required by the Inland Revenue Department to provide documentary proof to support your above claim.)

SECTION D: Income Distribution

- If the income payment currency of the security is HKD, USD, EUR or CNY, and the record date is one business day prior to the coupon payment date, the security will automatically be linked up to the CMU system with income payment distributed via CMU’s corporate action platform. Income proceeds will be distributed automatically in the CMU system at the start of the “CMUS coupon and redemption processing window” scheduled at 3:45 p.m. Paying agent should exercise due diligence in ensuring income distributed in the CMU system has no conflict with all terms and conditions of the security. Please refer to Part II – clause 5.4 of the CMU Reference Manual.

Please tick the below box if you do **NOT** wish the income payment to be automatically debited by the CMU system at 3:45 p.m.:

☐ I/We, as the paying agent, will release income payment ourselves on the intended payment day via the “Maintain Income Payment Details” function of CMT before the start of “CMUS coupon and redemption processing window” scheduled at 3:45 p.m.

1. We refer to the CMU Membership Agreement between us dated _____ ("the Agreement"). Clause 1 of the Agreement shall apply to the interpretation of this undertaking.
2. In consideration of your agreeing to our acting as lodging agent for _____ ("the CMU Instrument") issued or accepted by the principals listed in Schedule 1 (each a "Principal") we hereby represent and warrant that we have obtained from each of the Principals acknowledgements and authorities in the terms set out in Schedule 2.
3. We undertake to inform you immediately if we cease to act as lodging agent for the CMU Instrument. This undertaking shall survive the termination of the lodging agent's membership with the CMU system.

SCHEDULE 1

[Names and addresses of principals]

SCHEDULE 2

- A. An acknowledgement by the Principal, expressed to be in favour of the Monetary Authority (the “MA”) and its servants and agents, that the terms of the CMU Membership Agreement and the CMU Rules (as defined in the CMU Membership Agreement) will apply to the CMU Instrument specified in paragraph 2 above which is lodged with the CMU Service and to all transactions and operations effected through the CMU Service in relation to the CMU Instrument, including transactions and operations relating to the lodgement, withdrawal or redemption of the CMU Instrument and in particular (but without limiting the generality of the foregoing) -
- (i) that the MA and its servants and agents are, with the limited exceptions expressly provided in the CMU Membership Agreement, exempt from liability caused directly or indirectly by the operation of the CMU Service and MA is entitled without liability to act without further enquiry on instructions or information or purported instructions or information received through the CMU Service or otherwise in accordance with the CMU Manual;
 - (ii) that notwithstanding any checks or other investigations carried out by the MA, the MA is under no liability to any person (whether or not a member of the CMU Service) as a result of any actual or alleged defect or irregularity with respect to any CMU Instrument lodged with or held in the CMU Service, any signature or purported signature appearing on any such CMU Instrument, any disposition or purported disposition of any such CMU Instrument or any inconsistency of any such CMU Instrument with the details specified in respect of that CMU Instrument in the CMU Service.

- B. An authority for the CMU Member on behalf of the Principal to do all such acts and things and execute all such documents as may be required to enable the CMU Member fully to observe and perform its obligations under the CMU Membership Agreement and the CMU Rules and to enter into any arrangement which the CMU Member considers proper in connection with the lodgement with the CMU Service of the CMU Instrument, the holding of the CMU Instrument in the CMU Service and (unless another CMU Member is for the time being appointed to act as paying agent of the CMU Instrument on behalf of the Principal) the redemption of the CMU Instrument, including (but without limiting the generality of the foregoing) authorities for the CMU Member on behalf of the Principal -
- (i) to issue and authenticate the CMU Instrument (including issue and authentication on splitting and, where necessary, on withdrawal from the CMU Service);
 - (ii) to make payments in respect of the CMU Instrument in the manner prescribed by the CMU Rules.
- C. An acknowledgement by the Principal that no further or other demand or presentation for payment of the CMU Instrument shall be required than the offer of the CMU Instrument to a CMU Account of a CMU Member (whether acting on its own behalf or as paying agent) in accordance with the CMU Rules and a waiver by the Principal of any further or other demand or presentment for payment.

Specimen Letter for Confirmation of Lodgement from Issuer

[Company letter head of the issuer]

Hong Kong Monetary Authority ("MA")
55, Two International Finance Centre
8 Finance Street, Central
Hong Kong
Attn: CMU

Date:

Re: Lodgement confirmation from []
("Issuer")

The lodging agent, [],
acting on our behalf, will send electronic copy of the executed global instruments to CMU
before the issue day, instead of lodging the original executed global instrument to the sub-
custodian of CMU. We, in the capacity of the Issuer of the debt securities to be issued in
the CMU confirm the following:

- (i) that the debt securities are registered securities. So long as the MA is registered in the issuer's register as the holder of the bonds on the issue day, legal title to the bonds is with the MA. The executed global instrument in electronic form does not affect the fact that the MA is the registered holder of the bonds on the issue day as indicated in the Issuer's register;
- (ii) that Hong Kong Monetary Authority (in its capacity as operator of the Central Moneymarkets Unit) is the person registered in the Issuer's register;
- (iii) that the electronic copy of the executed global instrument provided to the MA is a true copy of the original executed global instrument; and
- (iv) that the MA may rely on the electronic copy of the executed global instrument provided to the MA according to its terms as from the issue day.

SECTION C: Profits Tax Concession under the Inland Revenue Ordinance

- We hope that this issue will be considered by the Inland Revenue Department (IRD) for eligibility for profits tax concession under Section 14A and 26A of the Inland Revenue Ordinance (IRO). We understand that any subsequent changes regarding this issue, such as credit rating, need to be reported to the MA and as the case may be, to the IRD at the earliest time possible.
 - ☐ Yes, I/we confirm that the instrument is, at issuance, issued in Hong Kong to:
 - ☐ (i) 10 or more persons; or
 - ☐ (ii) less than 10 persons, none of whom is an associate of the issuer of the instrument.
(Please refer to section 14A(A) of the IRO for the definition of “associate”. For more information, you may also wish to visit http://www.ird.gov.hk/eng/tax/bus_pft.htm#08.)
(Please note that you may be required by the Inland Revenue Department to provide documentary proof to support your above claim.)
 - ☐ No

SECTION D: Income Distribution

- If the income payment currency of the security is HKD, USD, EUR or CNY, and the record date is one business day prior to the coupon payment date, the security will automatically be linked up to the CMU system with income payment distributed via CMU’s corporate action platform. Income proceeds will be distributed automatically in the CMU system at the start of the “CMUS coupon and redemption processing window” scheduled at 3:45 p.m. Paying agent should exercise due diligence in ensuring income distributed in the CMU system has no conflict with all terms and conditions of the security. Please refer to Part II – clause 5.4 of the CMU Reference Manual.

Please tick the below box if you do **NOT** wish the income payment to be automatically debited by the CMU system at 3:45 p.m.:

- ☐ I/We, as the paying agent, will release income payment ourselves on the intended payment day via the “Maintain Income Payment Details” function of CMT before the start of “CMUS coupon and redemption processing window” scheduled at 3:45 p.m.
- **Please also select whether income proceeds will still be distributed during full-day typhoon:**
 - ☐ Yes ☐ No

Paying agent can change the setting of this typhoon indicator at any time via the “Maintain Income Payment Details” function of CMT before typhoon day.

Price-Yield Conversion Algorithm

Calculation of Bond Price

For a coupon bearing issue that is allotted at yield, the equivalent bond price is determined by the following formulae:

(1) If there is one coupon period or less until redemption, bond price is calculated as follows:

$$Pr\ ice = \left[\frac{100(M + \frac{rate \times 100}{freq})}{100 + \left(\frac{DSC}{E} \times y \times 100 \right)} \right] - \left[\frac{A}{E} \times \frac{rate \times 100}{freq} \right]$$

(2) If there are more than one coupon period until redemption, bond price is calculated as follows:

$$Pr\ ice = \frac{M}{(1+y)^{(N-1+\frac{DSC}{E})}} + \sum_{h=1}^N \frac{100 \times \frac{rate}{freq}}{(1+y)^{(h-1+\frac{DSC}{E})}} - \left[\frac{A}{E} \times \frac{rate \times 100}{freq} \right]$$

where

- yld* = input yield or allotted yield of individual bid
- freq* = number of interest payments per year
- y* = *yld*/*freq*
- N* = number of coupons payable between settlement date and redemption date (round up to integer)
- rate* = coupon rate
- DSC* = number of days from settlement date to the next coupon date
- A* = number of days from beginning of coupon period to settlement date
- E* = number of days in coupon period in which the settlement date falls
- M* = 100% = maturity value

The interest interval of the issues must be 1, 3, 6 or 12 months.

Interest Interval	Frequency (freq)
1	12
3	4
6	2
12	1

1. This Tender Form has been made available by the Monetary Authority on behalf of MTRC to dealers appointed by the Monetary Authority for the purposes of the MTRC Note Issuance Programme ("Recognized Dealers") as an arranger for the issue of Notes by MTRC.

2. In arranging the issue of Notes, the Monetary Authority is acting solely as the agent of MTRC - neither the issue of the Tender Form by the Monetary Authority, the submission of the Tender Form by a Recognized Dealer nor the acceptance of any tender by the Monetary Authority or the MTRC will give rise to any contractual relationship between relevant Recognized Dealer and the Monetary Authority.

3. The submission of a Tender Form to the Monetary Authority will constitute an irrevocable and unconditional offer by the relevant Recognized Dealer to the MTRC to subscribe for Notes in the amounts and at the prices indicated overleaf and may be accepted in whole or in part by the MA on behalf of the MTRC. Such offer, once accepted in whole or in part by the MA on behalf of the MTRC (such acceptance to be conclusively evidenced by the completion and signature for or on behalf of the Monetary Authority of the Acceptance at the bottom of this Tender Form), will result in a contract ("**Tender Contract**") between the relevant Recognized Dealer and the MTRC for the allotment and subscription of Notes in the amounts and at the subscription price(s) accepted by the Monetary Authority subject to and on the terms set out below:

the Tender Contract incorporates (and the Notes will be subscribed for and issued in accordance with and subject to) all of the provisions set out in the standard form schedule current at the date of the contract, which schedule is entitled "Mass Transit Railway Corporation – HK\$10,000,000,000 Note Issuance Programme – Standard Tender Contract Schedule" and is available for inspection at the offices of the Monetary Authority at 55th Floor, Two International Finance Centre, 8 Finance Street, Central, Hong Kong

the Notes will be constituted by a trust deed (as amended, supplemented or novated, the "**Trust Deed**") dated 19th January, 1995 between the MTRC and Bermuda Trust (Far East) Limited as trustee, and holders of the Notes are entitled to the benefit of, and are bound by, and deemed to have notice of, the provisions of the Trust Deed; and

the Notes will be issued on the terms and subject to the Conditions set out in the Notes (including the terms and conditions endorsed thereon or incorporated by reference therein substantially in the form set out in the Trust Deed (a summary of which is set out, for information purposes only, in the Information Memorandum relating to the Programme), read together with (and subject to) the Tender Notice referred to overleaf).

Underwriting Arrangement for EFCS issues

Eligible Market Makers (EMMs) have equal obligation to underwrite all issues of EFNs. In any one issue, if the total quantity of Notes applied by EMMs is less than the issuance size available to competitive tender, the issue is regarded as under-subscribed. The weighted-average price of successful applications is first calculated. The unsubscribed portion of the issue is then assigned to EMMs at the weighted-average price. Amount assigned must be in multiples of minimum denomination, which is HK\$50,000. Several key terms are defined as follows for the purpose of describing the underwriting arrangements.

Amount Applied The total quantity of an issue applied by an individual EMM.

Amount Assigned The quantity of an issue assigned to an individual EMM under the underwriting arrangements.

Allotment The sum of Amount Applied and the Amount Assigned

The underwriting obligations of EMMs are determined according to the following method:

Let X be the total issuance size available to competitive tender, and N be the number of EMMs.

Rank the EMMs according to Amount Applied: {EMM₁, EMM₂, ... EMM_N}. EMM₁ has the highest Amount Applied and EMM_N the lowest.

Let Q_i be the Amount Applied by EMM_i, such that

$$Q_1 \geq Q_2 \geq \dots Q_N$$

The largest possible integer K is identified such that:

$$Q_K \geq \frac{\left(X - \sum_{i=1}^K Q_i\right)}{(N-K)} \quad (1 \leq K \leq N)$$

EMM₁ to EMM_K are exempted from the underwriting. If there does not exist a value of K which can meet the condition stated in Point 4, then all EMMs are required to underwrite the unsubscribed portion, and the value of K is set as zero. EMM_{K+1} to EMM_N are required to underwrite the unsubscribed portion, such that each of {EMM_{K+1}, EMM_{K+2}, ... , EMM_N} ends up with the same Allotment. This can be graphically illustrated below, with the bars representing Amount Applied, and the area representing the Amount Assigned. The area is precisely equal to the unsubscribed portion of the issue.

Hong Kong Monetary Authority

Central Moneymarkets Unit

Graphical Illustration of Underwriting Arrangements

To make each of $\{EMM_{K+1}, EMM_{K+2}, \dots, EMM_N\}$ ends up with the same Allotment, such Allotment, denoted as A , is obtained by rounding down the following quantity:

$$\frac{\left(X - \sum_{i=1}^K Q_i\right)}{(N - K)} \quad \text{to the nearest multiple of HK\$50,000; or}$$

$$\frac{X}{N} \quad \text{to the nearest multiple of HK\$50,000, only if all EMMs are required to underwrite.}$$

Thus, the Amount Assigned for EMM_i is given by: $A - Q_i$

Any remaining unallocated Notes (i.e., odd lots) will be balloted among $\{EMM_{K+1}, EMM_{K+2}, \dots, EMM_N\}$

A numerical example is shown in Table 1 to 3 for illustration:

In Table 1, 12 EMMs submitted their application for an EFN with an issuance size of 1200mn for competitive tender.

Table 2 ranks the EMMs according to Amount Applied.

The maximum integer K is identified to be 4 (applying condition in Point 4 above).

EMM_1 to EMM_4 are exempted from the underwriting. EMM_5 to EMM_{12} are required to underwrite the unsubscribed portion, such that each of $\{EMM_5, EMM_6, \dots, EMM_{12}\}$ ends up with the same Allotment.

Hong Kong Monetary Authority Central Moneymarkets Unit

Allotment is obtained by rounding down the following quantity:

$$\frac{\left(X - \sum_{i=1}^K Q_i\right)}{(N - K)} = (1200 - 635.5) / 8 \quad (\text{in millions})$$

$$= 70.563 \text{ i.e. } 70.55 \text{ (rounded down)}$$

The remaining odd lots of 100,000 will be balloted to EMM₅ to EMM₁₂, two of which are randomly selected, each taking up 50,000.

The result of underwriting is shown in Table 2 on the last 2 columns on the right. In the case of EMM₉, it receives 70.6 mn, 30 mn of which is based on the EMM's original application, 40.55 mn from its underwriting obligation, and 0.05mn from ballot.

The final allocation in this numerical example is shown in Table 3, with Amount Assigned highlighted in red.

Bond Swap Facility- Eligible Bonds required at Initiation

Nominal value of the Eligible Bonds required at Initiation is calculated as follows:

$$\text{Nominal value of Requested Bonds} \times \frac{MV_{RB}}{DMV_{EB}}$$

(rounded up to the nearest HK\$50,000)

where, MV_{RB} = Market Value of Requested Bonds on the Requesting Date
 DMV_{EB} = Discounted Market Value of Eligible Bonds on the Requesting Date

“Market Value” will be calculated as follows:

$$\text{Market Value} = \frac{\text{Price}}{100} + \frac{\text{Coupon Rate}}{100} \times \frac{I}{365}$$

where, I = Number of calendar days since the last interest payment date (or if no interest payment has been made, the number of calendar days since the issue date) up to but excluding the scheduled Initiation Date

“Discounted Market Value” is calculated as follows:

$$\text{Discounted Market Value} = \text{Market Value} \times (1 - HC)$$

where, HC = Based on the remaining maturity of Eligible Bonds on the scheduled Initiation Date

Remaining maturity	HC

Examples of Linked Transaction

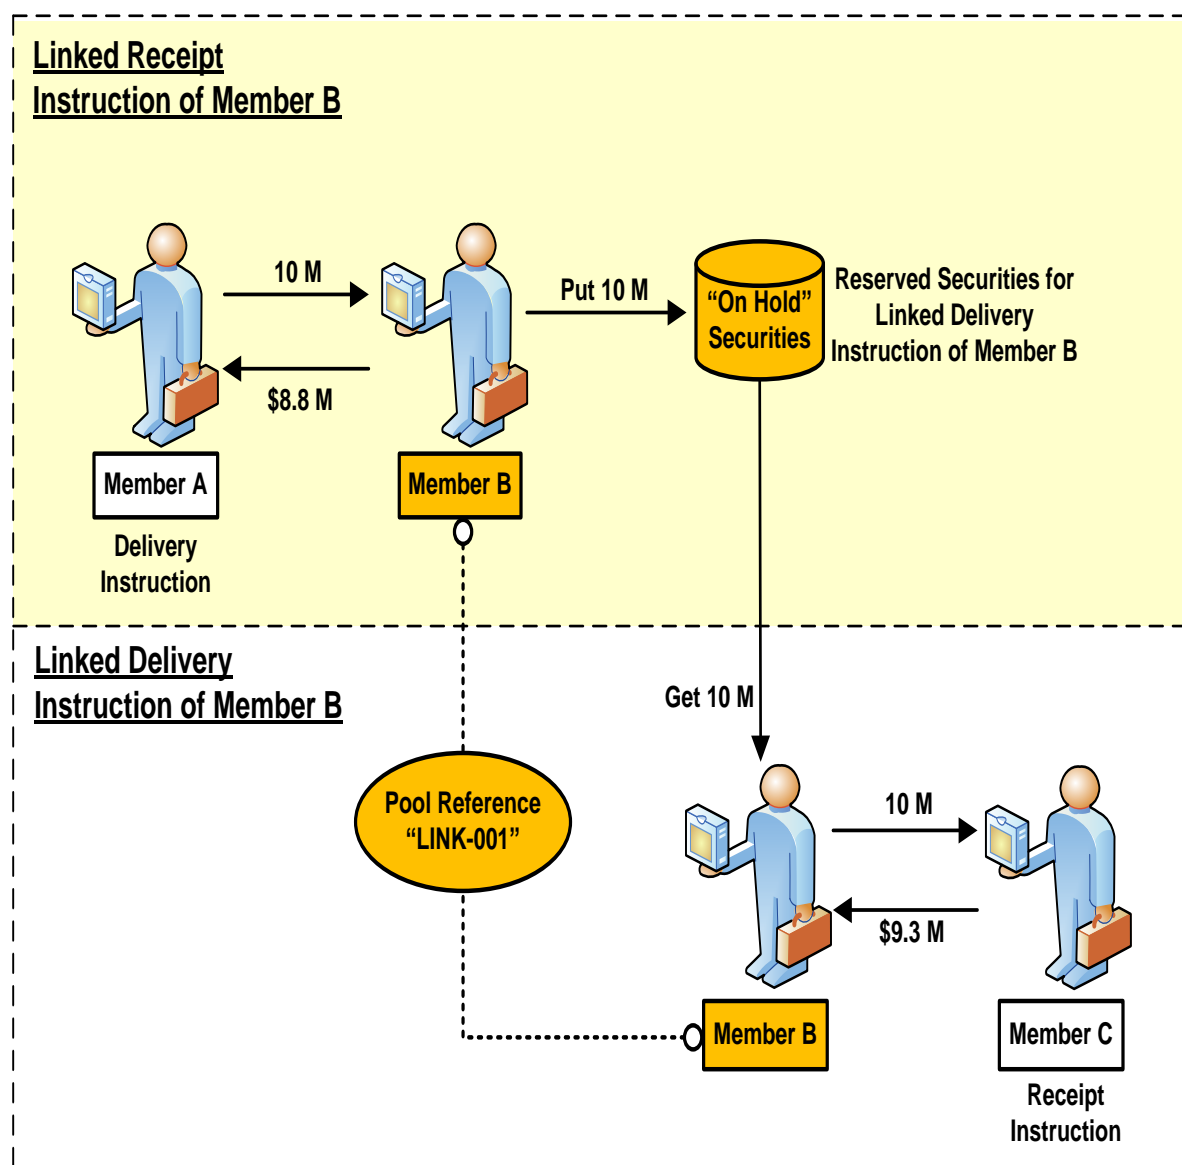

I.2 Example of Single Delivery Linked Transaction

I.2.1 Simple Linear Link involving 3 Members

Example 1

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8mn.
2. Member B has an instruction in place to deliver 10 mn securities to Member C against payment of HK\$9.3mn.

Upon delivery of 10 mn securities from Member A to Member B's Securities Account, the securities is reserved for Member C. Upon completion of instruction 1, instruction 2 will be settled accordingly.

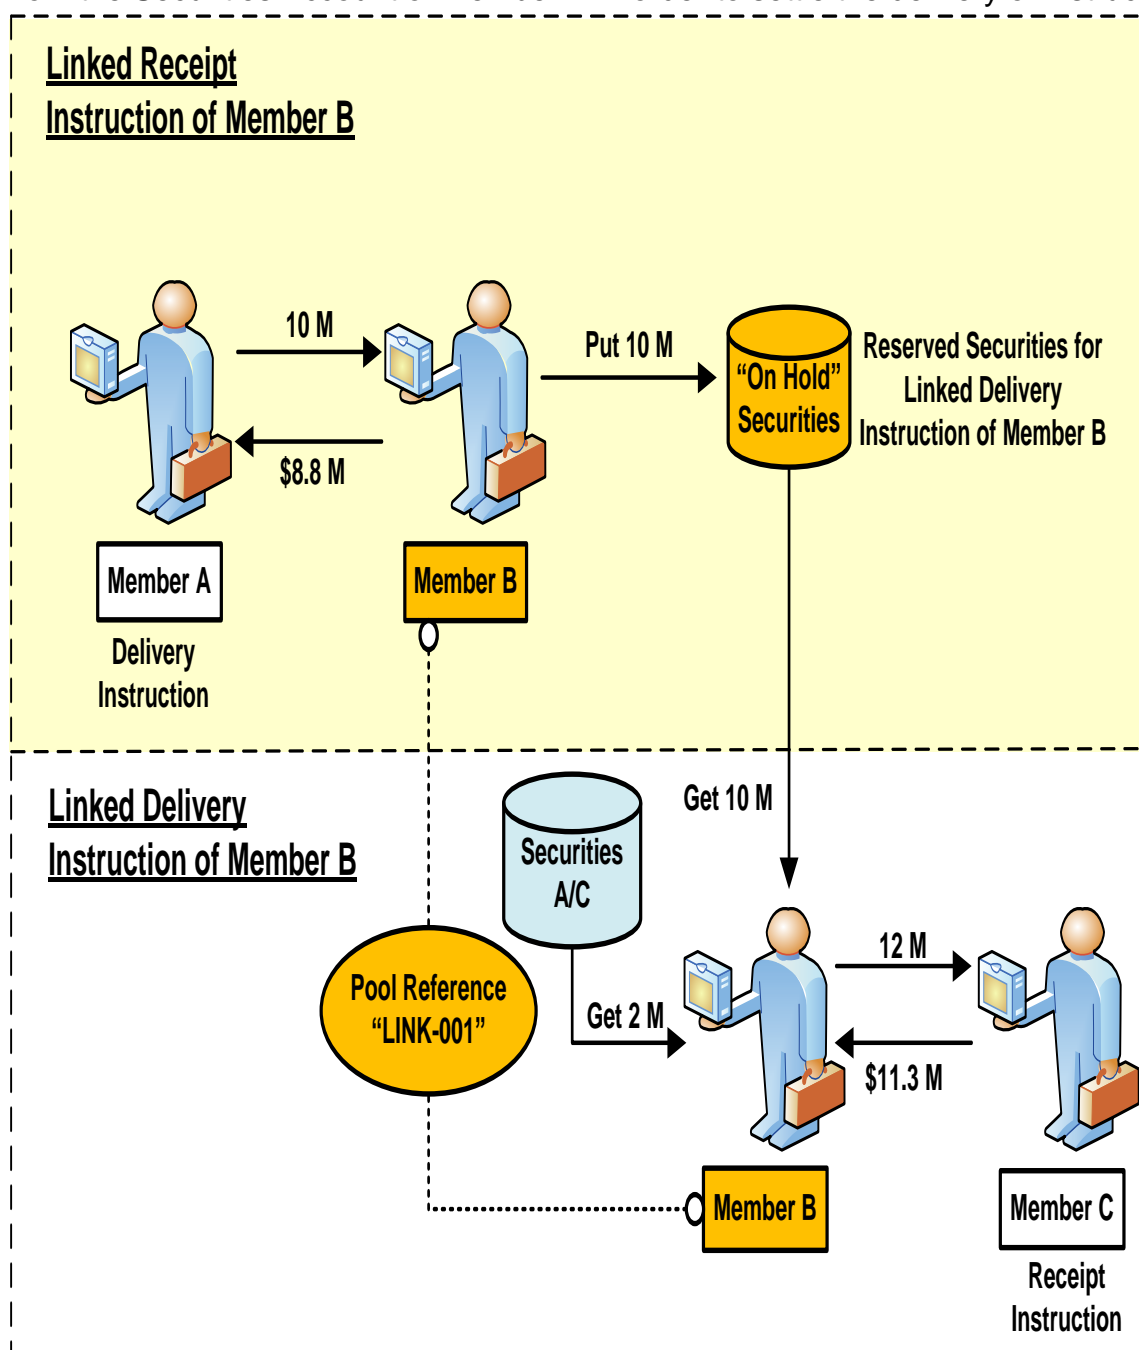

I.2.2 Simple Linear Link involving 3 Members but required Additional Securities debited from Account

Example 2

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8mn.
2. Member B has an instruction in place to deliver 12 mn securities to Member C against payment of HK\$11.3 mn.

Upon delivery of 10 mn securities from Member A to Member B's Securities Account, the securities is reserved for Member C. An additional 2 mn of securities is debited from the Securities Account of Member B in order to settle the delivery of instruction 2.

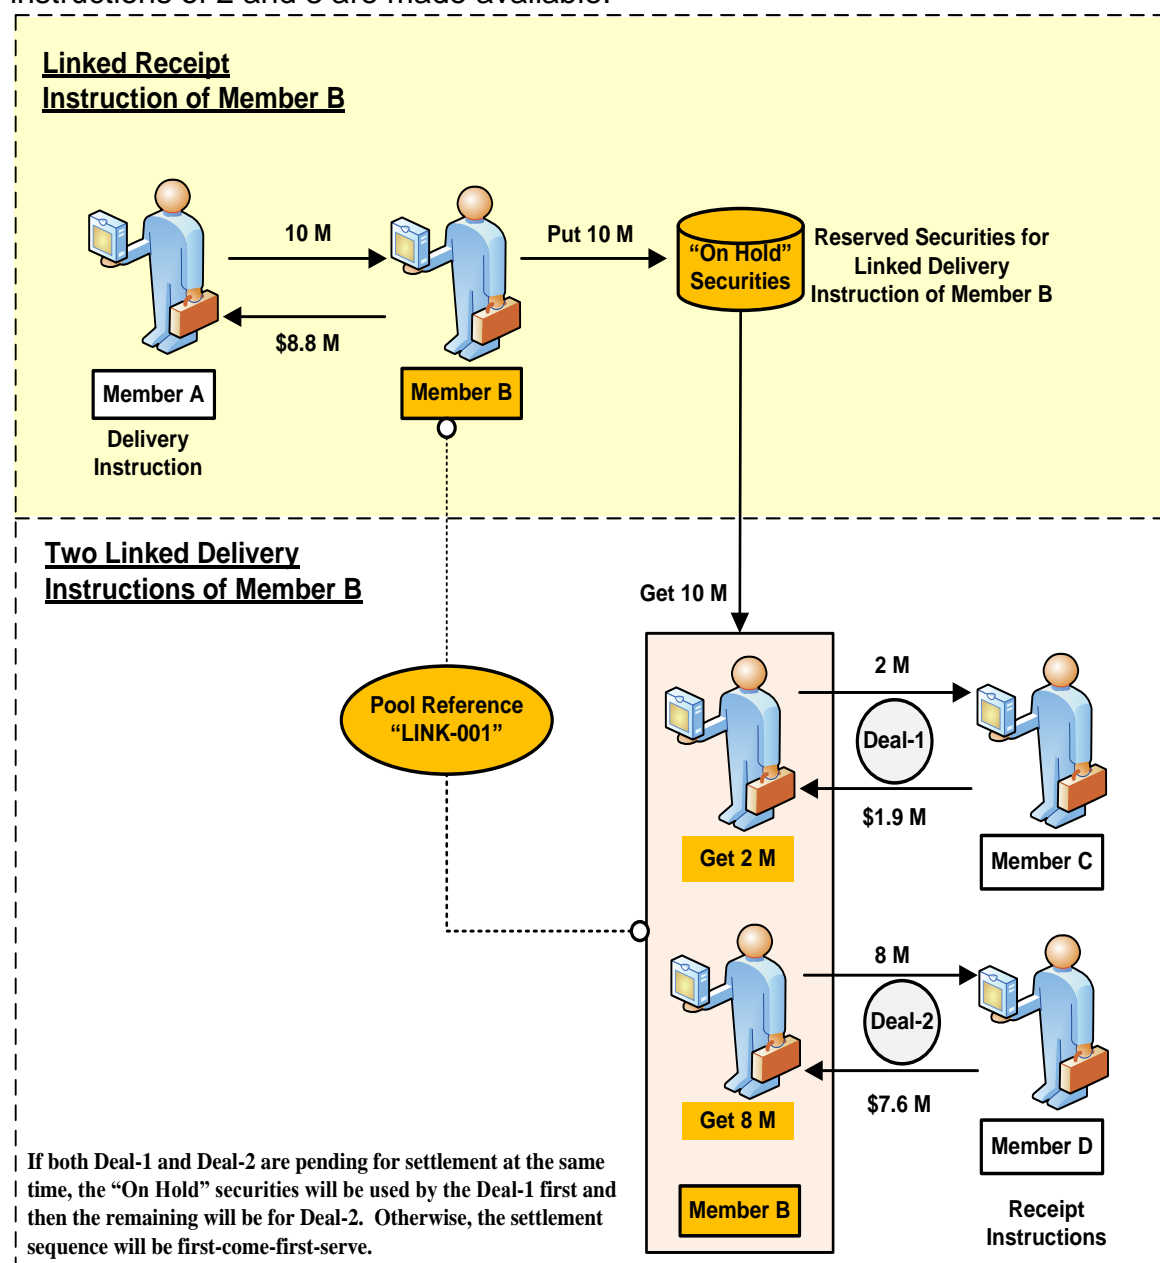

I.3 Example of Multiple Delivery Linked Transaction

I.3.1 Single Receipt with Multiple Linked Delivery Instructions

Example 3

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8 mn.
2. Member B has an instruction in place to deliver 2 mn to Member C against payment of HK\$1.9 mn
3. Member B has another instruction in place to deliver 8 mn to Member D against payment of HK\$7.6 mn.

Upon delivery of 10 mn securities from Member A to Member B's Securities Account, the securities is reserved for onward delivery of 2 mn to Member C and 8 mn to Member D. Upon completion of transactions 1, subsequent settlement of delivery instructions of 2 and 3 are made available.

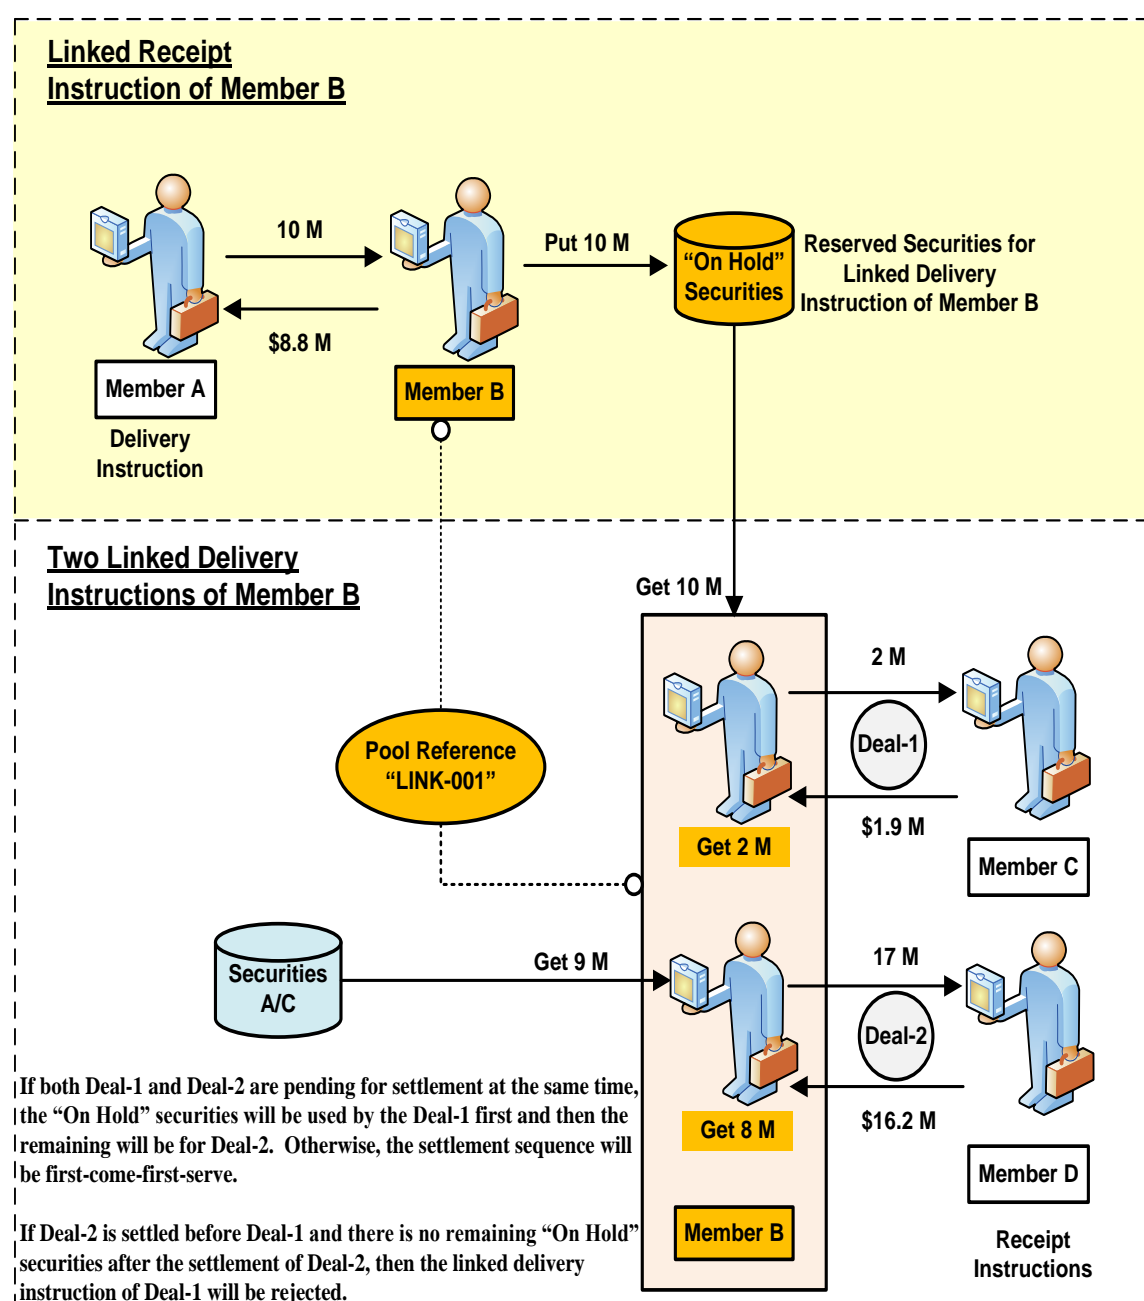

I.3.2 Single Receipt with Multiple Linked Delivery Instructions but required Additional Securities debited from Account

Example 4

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8 mn.
2. Member B has an instruction in place to deliver 2 mn securities to Member C against payment of HK\$1.9 mn.
3. Member B has another instruction in place to deliver 17 mn securities to Member D against payment of HK\$16.2 mn.

Upon delivery of 10 mn securities from Member A to Member B's Securities Account, as instruction 2 comes in first before instruction 3, the securities is reserved for Member C and instruction 2 is settled first. An additional 9 mn securities is debited from the Securities Account of Member B for onward delivery of 17 mn to Member D.

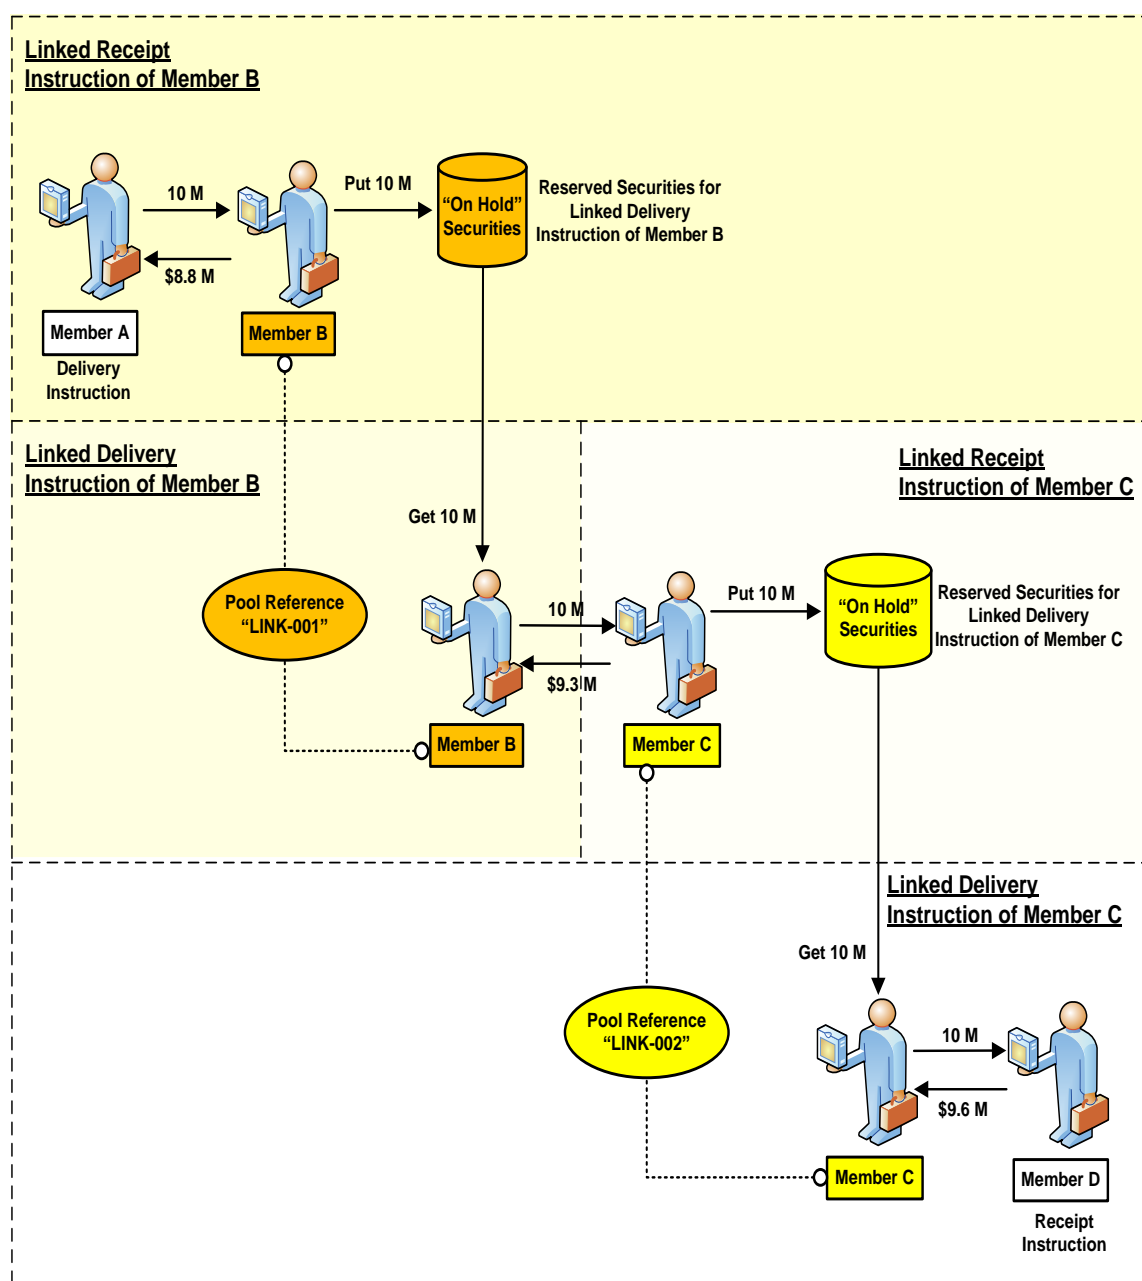

I.4 Example of a Chain of Linked Transaction involving Multiple Intermediaries

Example 5

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8 mn.
2. Member B has an instruction in place to deliver 10 mn securities to Member C against payment of HK\$9.3 mn.
3. Member C has an instruction in place to deliver 10 mn securities to Member D against payment of HK\$9.6 mn.

Upon delivery of 10 mn securities from Member A to Member B's Securities Account, the securities is reserved for Members C. Upon completion of instructions 2, the 10 mn securities is reserved for Member D and instruction 3 is settled accordingly.

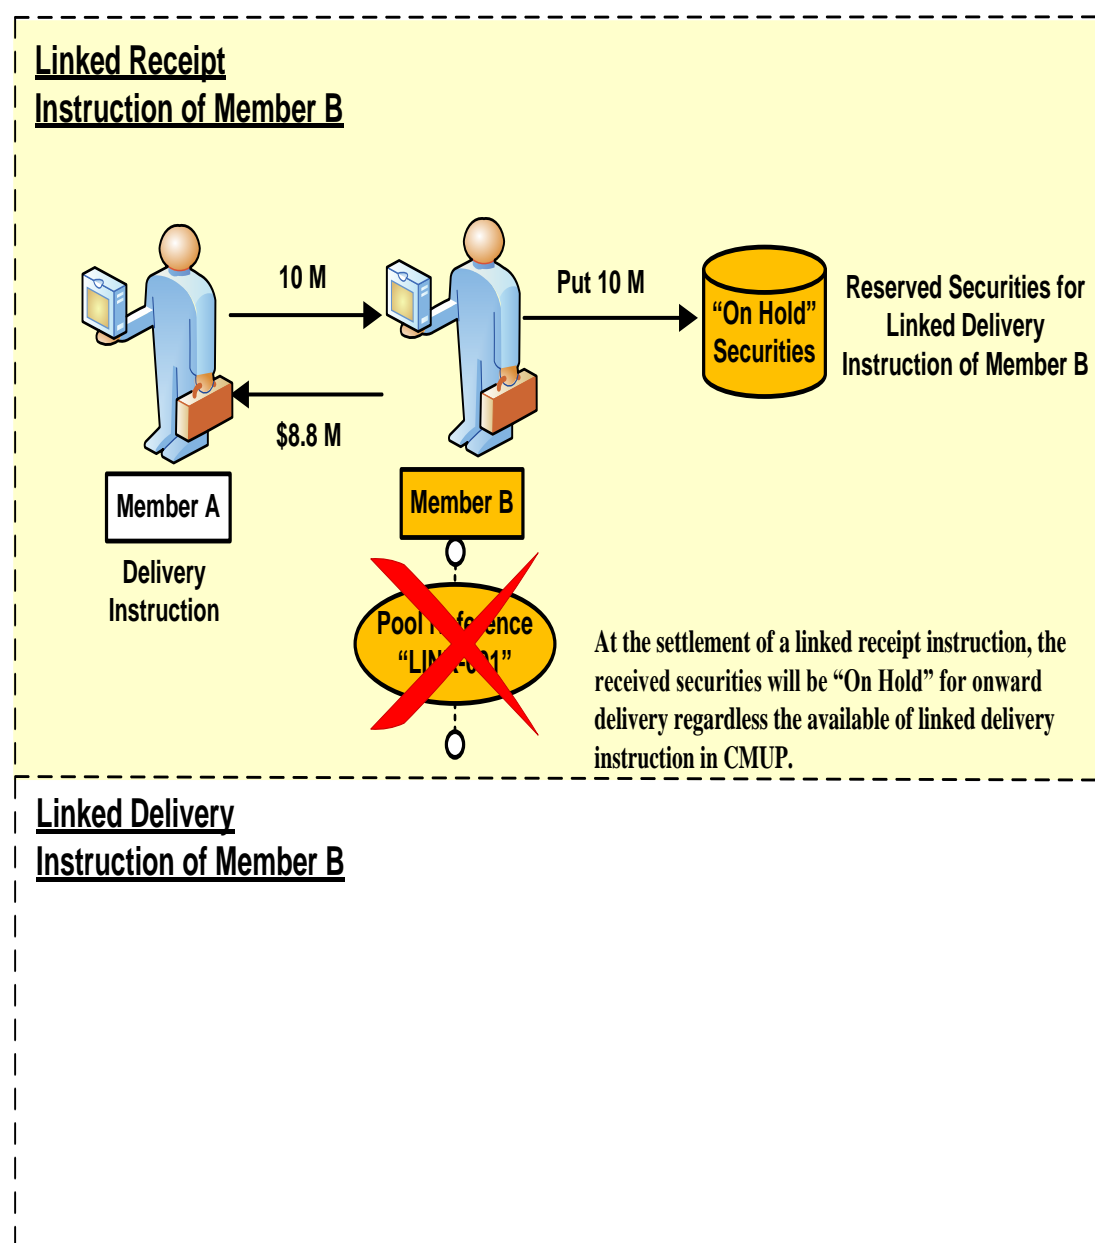

I.5 Example of Linked Receipt Instruction but missing Linked Delivery Instruction

Example 6

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8 mn.
2. But there is missing linked delivery instruction from Member B to another member.

Upon delivery of 10 mn securities from Member A to Member B, the securities is reserved in Member B's Securities Account pending for further matching with the corresponding linked delivery instruction. If there is no linked delivery instruction being identified before CMUS/EFCS cut-off, the 10 mn securities being held up will be released and become tradable thereafter.

I.6 Example of Linked Delivery Instruction but missing Linked Receipt Instruction

Example 7

1. Member B has an instruction in place to deliver 10 mn securities to Member C against payment of HK\$8.8 mn.
2. But there is a missing linked receipt instruction for Member B.

Due to missing/unexecuted linked receipt instruction, Member B does not receive 10 mn securities from another member. Therefore, instruction 1 for Member B to deliver 10 mn securities to Member C cannot be made.

Linked Delivery

Instruction of Member B

If a linked delivery instruction cannot locate a settled linked receipt instruction with the same Pool Reference, it will wait in “Insufficient Stock” status for the input and settlement of the receipt instruction to trigger its settlement by the “On Hold” securities.

I.7 Example of Single House Transfer with Pool Reference

Example 8

1. Member B has a transfer instruction of 10 mn securities from its 000 to 001 account bearing pool reference.

The house transfer will not be executed as a single house transfer is not a valid qualifying instruction for linked transaction type.

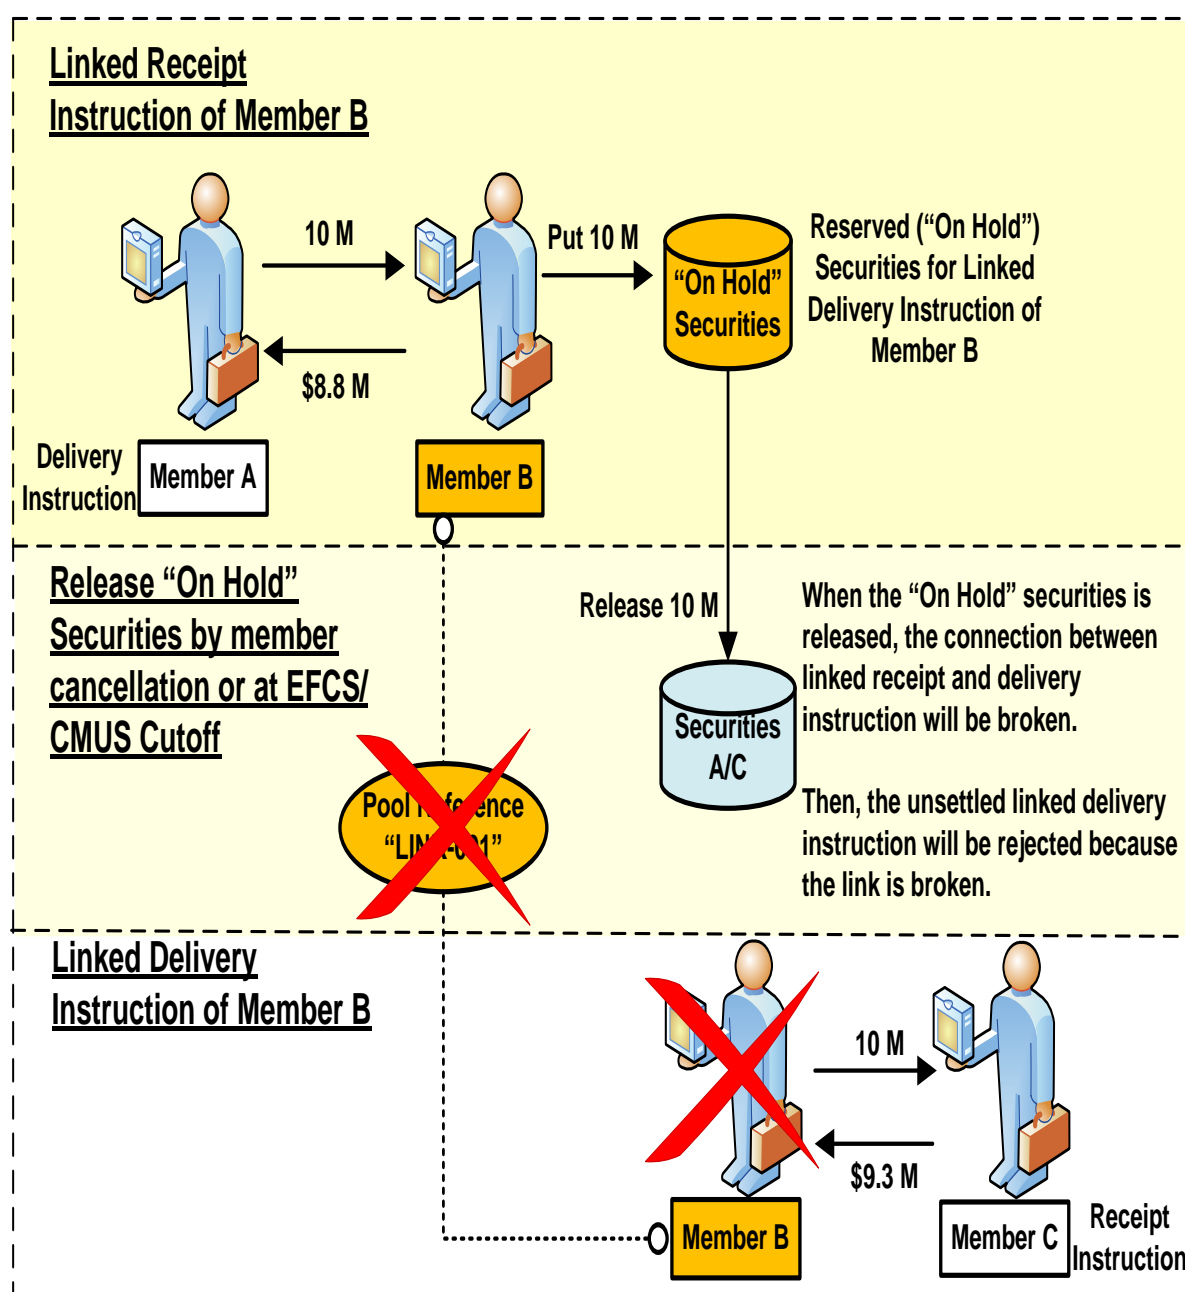

I.8 Example of Broken Link

Example 9

1. Member A has an instruction in place to deliver 10 mn securities to Member B against payment of HK\$8.8 mn.
2. Member B has an instruction in place to deliver 10 mn securities to Member C against payment of HK\$9.3 mn.

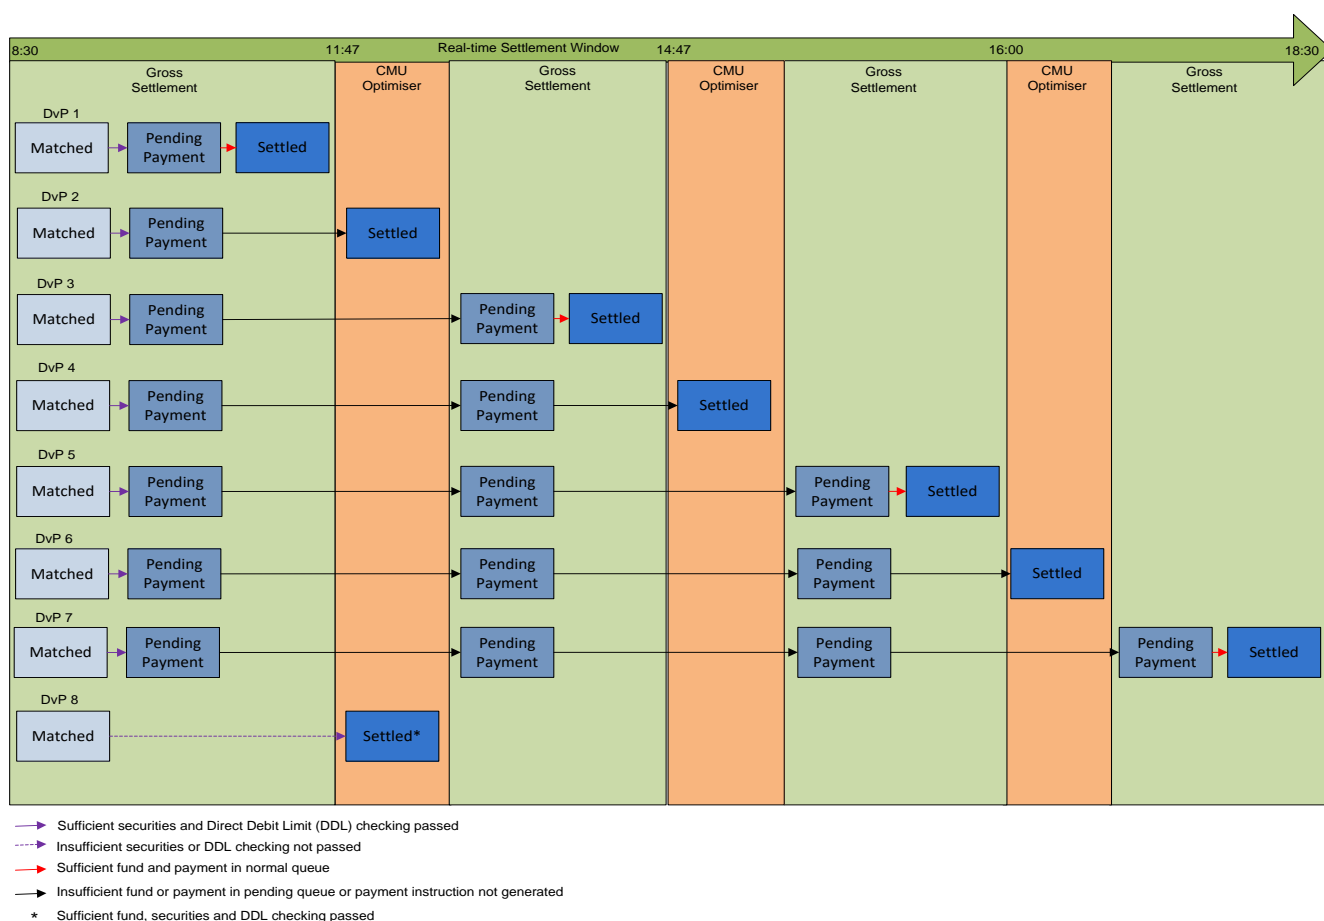

Upon delivery of 10 mn securities from Member A to Member B's Securities Account, the securities is reserved for Members C. Due to (i) cancellation and release of the securities previously held up by Member B (ii) at CMUS/EFCS cut-off, the link is broken up and the 10 mn securities is no longer held up for further delivery to Member C.

Settlement Flow diagram of real-time CMU Securities Transfer

On settlement date, securities transfers are settled at real-time with periodic CMU optimiser running during the day. The following diagram illustrates the settlement processing flow for different settlement scenarios of matched DvP transactions. Please note DvP transactions with “matching only indicator” turned on will not be included in the settlement process.

The settlement flow diagram is applicable to HKD, EUR and CNY DVP transactions. As for USD DVP, the transaction must have the relevant IFT05/06/31/38/39 in place, and has successfully passed through the HSBC Sanction Screening System (HSSS) screening process before it can enter into the CMU settlement cycle.

Part III – Collateral Management

The Value of Securities to be acquired under Repo Transactions

The value of securities to be acquired for both Intraday and DW/FPS DW/Overnight Repo Transactions will be calculated on the basis of a “Discounted Market Value” of such securities which equals the market value of such securities multiplied by a Required Margin.

The market value of securities will be calculated as follows:

For price-bid issues,

$$\text{Market Value in borrowing currency} = \text{Nominal Value} \times \left(\frac{\text{Price}}{100} + \text{Coupon Rate} \times \frac{I}{T} \right) \times R$$

For yield-bid issues,

$$\text{Market Value in borrowing currency} = \frac{\text{Nominal Value}}{1 + \frac{D}{T} \times \text{Market Yield}} \times R$$

where:

I = number of calendar days since last interest payment date (or if no interest payment has been made, the number of calendar days since issue date)

D = number of calendar days to maturity

T = 360 or 365, depending on the day count convention of the securities

R = exchange rate for converting market value in nominal currency of the securities into borrowing currency. R is equal to 1 if the nominal currency of the securities is the same as the borrowing currency.

The “price” or “yield” is the average of the prices or rates bid by Market Makers or reputable institutions as the case may be.

“Discounted Market Value” is then calculated as follows:

$$\text{Discounted Market Value} = \text{Market Value} \times \left(1 - \frac{M}{365} \times H \right) (1 - X)$$

where:

M = number of calendar days to maturity

H = applicable haircut (per year of remaining maturity)

X = applicable cross-currency haircut

Example to illustrate the Applicable Discount Rates

Bank A holds the following eligible debt securities under the [Discount Window](#):

	<u>Quantity</u> (HK\$ Mn)	<u>Market Value</u> (HK\$ Mn)	<u>Market Value after Haircut</u> (HK\$ Mn)
<u>Exchange Fund Paper:</u>			
Issue A	100	120	110
Issue B	200	180	170
Issue C	300	250	220
Total	600	550	500

Eligible debt securities other than Exchange Fund paper:

Issue A (MTRC Notes)	300	280	250
Issue B (non-AAA securities)	400	420	350
Issue C (non-AAA securities)	500	400	300
Total	1200	1100	900

If Bank A borrows HK\$ 1,000 mn and collateralises its repo by using the Exchange Fund paper for the borrowed amount of HK\$400 mn and other eligible securities for the borrowed amount of HK\$600 mn. The discount rates will be calculated as follows:

For repo with Exchange Fund paper as collateral:

Maximum borrowing amount	= Total Market Value after Haircut = HK\$500 mn
Maximum borrowing amount charging on the Base Rate	= HK\$500 mn x 50% = HK\$250 mn
Hence, the borrowing amount of HK\$400 mn will be divided into two parts	(1) HK\$250 mn (charging on the Base Rate) (2) HK\$150 mn (charging on the Base Rate plus 5% or overnight HIBOR for the day, whichever is higher)

For repo with other eligible securities as collateral:

Maximum borrowing amount	= Total Market Value after Haircut = HK\$900 mn
Maximum borrowing amount charging on the Base Rate + 0.25% (if applicable)	= HK\$900 mn x 50% = HK\$450 mn
Hence, the borrowing amount of HK\$600 mn will be divided into three parts	(1) HK\$250 mn (charging on the Base Rate) (2) HK\$200 mn (charging on the Base Rate + 0.25%) (3) HK\$150 mn (charging on the Base Rate + 0.25% plus 5% or overnight HIBOR for the day + 0.25%, whichever is higher)

Repurchase Price of DW/FPS DW Repo Transactions

The Repurchase Price of each DW/FPS DW Repo Transaction will be the sum of the initial purchase price for the securities sold under such transaction and the Price Differential if any calculated for the period during which the transaction is outstanding.

The Price Differential, if any, in respect of each DW/FPS DW Repo Transaction is calculated at the time of any request for a DW/FPS DW Repo Transaction or at the time of conversion of any Intraday Repo Transaction into a DW Repo Transaction by applying a pricing rate equivalent to the DW Base Rate (for DW only) to the purchase price¹ of the DW Repo Transaction on a daily basis from and including the purchase/conversion date up to but excluding the repurchase date. Provided that the calculation will be adjusted to reflect the actual lending period if the repurchase date is postponed as set out in Part I - clause 8 on “Typhoon and Rainstorm Procedures” of the CMU Reference Manual.

$$\text{Price Differential} = \text{Purchase Price} \times R \times \frac{D}{365}$$

where, D = The number of days from and including the purchase/conversion date of the DW/FPS DW Repo Transaction up to but excluding the repurchase date

R = Applicable Discount Rate (Please refer to Clause 4.1.3)

365 = Number of days in a year (disregarding any leap year)

¹The purchase price of a DW Repo Transaction which is converted from an Intraday Repo Transaction will be a sum equivalent to the aggregate of the purchase price and the accrued price differential under the relevant Intraday Repo Transaction.

Repurchase Price of LAW/Intraday Repo Transactions

The Repurchase Price of each LAW Intraday Repo Transaction will be the sum of the initial purchase price for the securities sold under such transaction and the Price Differential.

The Price Differential in respect of each LAW Intraday Repo Transaction is calculated at the time the LAW Intraday Repo Transaction entered into by applying a pricing rate to the purchase price for the period of one day (notwithstanding that the relevant securities may be repurchased on the same business day that the relevant LAW Intraday Repo Transaction is entered into).

The present intraday pricing rate for LAW Intraday Repo Transactions is DW Base Rate

$$\text{Price Differential} = \text{Purchase Price} \times R \times \frac{D}{365}$$

Where, D = One day
R = DW Base Rate
365 = Number of days in a year (disregarding any leap year)

Example to illustrate the Generation of Multiple Repo Transactions

The maximum number of eligible issues to be selected in a single repo transaction is 19. When this maximum number is reached for any repo request, the CMU system will automatically generate another new repo transaction(s) until the total Discounted Market Value (DMV) can cover the Repo lending amount.

Example

A CMU Participant has 26 issues of EFBN with a total DMV of HK\$900mn.

<u>Issue no.</u>	<u>No. of issue</u>	<u>DMV (HK\$ mn)</u>	<u>Cumulative DMV (HK\$mn)</u>
Issue Q001 to Q005	5	500	500
Issue Q006 to Q019	14	100	600
Issue Q020 to Q023	4	100	700
Issue Q024	1	180	880
Issue Q025 to Q026	2	20	900

Scenario 1 (Max repo size not defined and more than 19 issues are selected)

The CMU Participant does not define the maximum size for an individual Repo Transaction. However, when the no. of selected issues exceeds 19 for a single repo request, 2 repo transactions are generated.

Case	Max repo size defined	Lending Amount (HK\$mn)	No. of repo transaction	Issues selected	Total DMV (HK\$ mn)	Status
1	0	700	2	Q001 – Q019 (19 issues)	600	Accepted
				Q020 – Q023 (4 issues)	100	

Scenario 2 (Max repo size defined)

The CMU Participant defines the max size of an individual Repo Transaction to be HK\$500mn.

Case	Max repo size defined	Lending Amount (HK\$mn)	No. of repo transaction	Issues selected	Total DMV (HK\$ mn)	Status
2	500	881	3	Q001 - Q005 (5 issues)	500	Accepted
				Q006 – Q024 (19 issues)	380	
				Q025 (1 issue)	1*	

* The minimum repo size (HK\$5mn for intraday repo, and HK\$20mn for DW/FPS DW repo) does not apply to the last Repo Transaction generated from the single repo request.

Section B : Threshold Range

We specify below the Threshold Range (i.e. the margin tolerance level) in which we wish the MA to take into account when processing a Mark-to-Market Operation. If no indications are specified in the table below, the Threshold Range is deemed to be the default range, being from 100% to 100% (i.e. it is defaulted to no tolerance).

The Threshold Range only relates to Triparty Repo Transactions processed under Auto Mode and is set at the CMU Participants level (that is, it applies to all Triparty Repo Transactions involving two CMU Participants (whether a CMU Participant or its client is a counterparty to the Triparty Repo Transactions)).

If the DMV of the Purchased Securities or the Equivalent Purchased Securities (as the case may be) in respect of a Triparty Repo Transaction falls within the Threshold Range specified below, no Top-up or Return of Securities will be conducted by the MA. The MA will check the Threshold Range only for Triparty Repo Transactions initiated in Auto Mode.

Haircut for Triparty Repo Transaction initiated in Auto Mode

Maturity Bands and Haircut

The following haircut will be applied to the remaining maturity of Eligible Securities. Corresponding haircut will then be applied to the market value to calculate the discounted market value.

Maturity Bands (Years)	Haircut
Within 5 years	2 %
More than 5 years	4 %

Cross Currency Haircut

Default cross-currency haircut is defined below. Cross-currency haircut applies where issue currency of the securities is not the same as the transaction currency.

	Applicable Haircut
HKD vs USD	1 %
Other currency pairs	5%

Discounted Market Value of Securities to be Acquired under Triparty Repo Transaction

The value of securities to be acquired for Triparty Repo transactions will be calculated on the basis of a “Discounted Market Value” (DMV) of such securities which equals the Market Value of such securities multiplied by a Required Margin.

The **Market Value** of securities will be calculated as follows:

For price-bid issues,

$$\text{Market Value} = \text{Nominal Value} \times \frac{\text{Price}}{100} + \text{Accrued Interest}$$

where:

I = Number of calendar days since last interest payment date (or if no interest payment has been made, the number of calendar days since issue date)

For yield-bid issues,

$$\text{Market Value} = \frac{\text{Nominal Value}}{1 + \frac{D}{\text{day basis}} \times \frac{\text{Market Yield}}{100}}$$

where:

D = number of calendar days to maturity

Discounted Market Value (DMV₁) is then calculated as follows:

$$\text{DMV}_1 = \text{Market value} \times (1 - \text{Effective haircut \%})$$

where:

Effective Haircut = applicable maturity band’s haircut % per annum of Eligible Securities as set out in Appendix N.3

If nominal currency is different from the Triparty Repo transaction currency, Discounted Market Value (DMV₂) is then calculated as follows:

$$\text{DMV}_2 = \text{DMV}_1 \times \text{exchange rate} \times (1 - \text{cross currency haircut \%})$$

where:

Cross-currency haircut = applicable cross-currency haircut % per annum of the currency pair as set out in Appendix N.3

DMV₂ must be at least equal to or greater than the repurchase price.

Illustrated Example to show Calculation of the DMV of Eligible Securities to be Acquired for a Triparty Repo Purchase

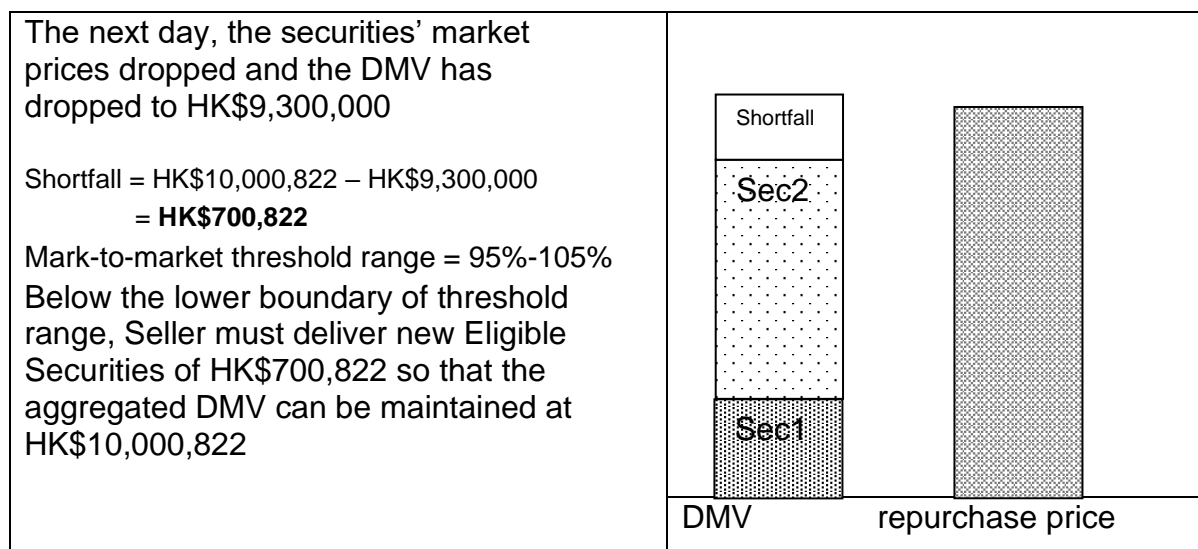

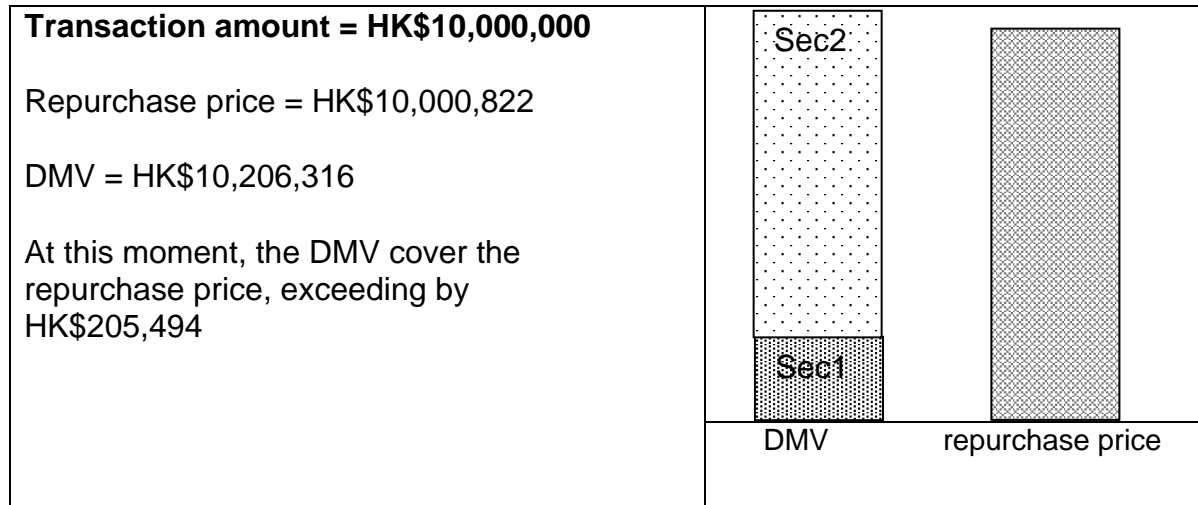

Repo purchase date	=14 Nov 2011
Purchase price	=HK\$10,000,000
Repo rate	=1%
Price differential	=HK\$821.92
Repurchase date	=28 Nov 2011
Repurchase price	=HK\$10,000,821.92
Holdings in seller's 777 a/c <u>before</u> repo:	Sec1 = HK\$1,000,000 Sec2 = CNY20,000,000
Holdings in seller's 777 a/c <u>after</u> repo:	Sec1 = 0 Sec2 = CNY11,500,000

<u>Proposed eligible securities:</u>	
Same currency, will be selected first	
Sec1 min denomination = HK\$50,000 and mature on 15 Nov 2012	Sec1 = HK\$1,000,000
Sec1 market price	=102.80
MV of Sec1 (including accrued interest)	=\$1,030,000
Sec2 min denomination = CNY500,000 and mature on 14 Nov 2018	Sec2 = CNY8,500,000
Sec2 market price	=98.250
MV of Sec2 (including accrued interest)	=CNY8,370,000

Securities	Purchased securities	Market price	Market value (with accrued interest)	Maturity date	Belongs to maturity band	Haircut for applicable maturity band	Foreign Exchange rate	Cross-ccy haircut	DMV (in transaction currency HK\$)
Sec1	HK\$1mn	102.80	HK\$1,030,000	15 Nov 2012	Below 5 years	2%	n.a.	n.a.	1,009,400
Sec2	CNY8.5mn	98.25	CNY8,370,000	15 Nov 2018	Over 5 years	4%	HKD/CNY 0.83	5%	9,196,916
Aggregate DMV									10,206,316*

*DMV is sufficient to cover the repurchase price of HK\$10,000,821.92
