

## Security Features of 2010 Series \$1,000 Banknotes Bank of China (Hong Kong) Limited

This design features Bank of China Tower and the bauhinia on the front. The back of the banknote highlights the spectacular landscape of Hong Kong. The banknote has several state-of-the-art security features, some of them are easily visible with naked eyes.

### Embossed Feel:

Raised printing giving the note a strong embossed feel by touch.

(Front)

### Colour-changing Windowed Metallic Thread (Viewed from different angles):

When the note is tilted, the thread shifts in colour between magenta and green. When examining it closely, microtext to build the large alphabets "H" and "K" can be seen.

(Back)

### Dynamic Colour-changing Pattern (Viewed from different angles):

When the note is tilted, the colour of the pattern shifts between green and gold, while at the same time a shimmering horizontal bar is seen to be rolling up and down.

### Fluorescent See-through Pattern :

The patterns on the front and back fit perfectly when the note is held up to the light. When the note is put under ultraviolet light, two fluorescent colours appear.
